

Important Notice: Fire Hydrant Flushing Program

May 14, 2025

The Town will be conducting a routine fire hydrant flushing program starting Tuesday, May 20, and will be ongoing for the next few weeks.

Flushing will begin in the Base Area and will continue throughout the town. While flushing takes place in specific areas, residents across the town may still experience temporary water discoloration and reduced water pressure. These effects are normal and should be brief.

If water discolouration occurs, we recommend running your cold water tap until the water clears.

We appreciate your understanding as we carry out this important maintenance to ensure water quality and system reliability.

Thank you for your understanding and cooperation.
