

Important Notice: Fire Hydrant Flushing Program

May 27, 2025

The Town is currently conducting a routine fire hydrant flushing program, which will continue over the next few weeks.

Flushing is underway in the Base Area and will progress throughout the community. During this time, residents and businesses may experience temporary water discoloration and reduced water pressure. These effects are normal and should be brief.

If discoloration occurs, we recommend running an outdoor tap (such as a garden hose) until the water runs clear. If you don't have an outdoor tap, use a cold water tap inside your home.

We appreciate your patience as we carry out this important maintenance work to maintain water quality and system reliability.

Thank you for your understanding and cooperation.
